The review of 2020

Trade volumes are growing steadily

- Traded volumes reached 587 GWh over the eight months since our launch in May 2020.
- The last three months topped 100GWh. November saw the historical high of over 150 GWh.
- Trades have been registered along the entire curve: Weeks, Months, Quarters, Seasons and Years for Tokyo Area Baseload
- Number of trading participants increased to 15 companies since launch. Participants are from all over the world — Japan, Singapore, UK, Ireland, France, Germany, Switzerland, Denmark, and US.
- We expect market activity to accelerate as more participants to join through 2021.

The latest update

Japanese spot market has spiked.

First two weeks of 2021 reached over 650 GWh.
