CAL21	13064	13025	▼39	-	-

The Capesize market was typified today with minimal trade fixtures combined with large downward rate movements. After yesterday's fall the market today was eerily quiet until shortly before index publication time. Just prior several trades were heard fixing at considerably lower levels solidifying many concerns of where the market was heading. Bid offers had shadowed each other down throughout the day on the back of yesterday's solid downward momentum.
